

A new flower based on the concept flowers 'Alambfleurics'.

The Orange Bulb Alambfleuric produces a typical orange fragrance, but has the quality of a perfume made of real flowers. The fragrance is more concentrated.

For more info and photo's click on 'Read More'

The experiments and mix of oranges and flowers are made in the Olfactology Lab, which will be also shown in the exhibition. A selection of experiment will be presented. The visitor can smell every experiment and have a look to the concept and technical drawings of the whole smell- installation.

“Olfactology Lab, The Orange Bulb Alambfleurics”

A new smell installation by Peter De Cupere

Nationaal Jenevermuseum Stad Hasselt
