

At living tomorrow a platform for future-oriented art is created.

The presentation of the works is not displayed as in a gallery, but is exhibited in a symbiotic integration with an eye on a future way of life.

The concept of the exhibition "NEXT DOOR" is simple. Our world is changing extremely fast. Next Door is a network-exhibition, a logical answer to our network society.

In Living Tomorrow Peter de Cupere shows his Brewery Flower concept. 5 drawings and 1 model of his Brewery Flowers.

Model
