

“Olfactology Lab, The Orange Bulb Alambfleurics”

A new smell installation by Peter De Cupere

Nationaal Jenevermuseum Stad Hasselt
Witte Nonnenstraat 19, 3500 Hasselt
Tel.: +32(0)11 23 98 53, Fax: +32(0)11 21 10 50

Exhibition until August 31, 2008
A new smell-installation based on experiments with orange, lemon, spices and plants.

Peter De Cupere creates a new flower based on his concept flowers 'Alambfleurics'.
The Orange Bulb Alambfleuric produces like her name says a typical orange fragrance, but has the quality of a perfume made of real flowers. The fragrance is more concentrated. The experiments and mix of oranges and flowers are made in the Olfactology Lab, which will be also shown in the exhibition. A selection of experiment will be presented. The visitor can smell every experiment and have a look to the concept and technical drawings of the whole smell-installation.
